# PRECISION UNDER PRESSURE

**GYS PLASMA  
NEOCUT  
125 CUTTER**

WM-067431

**STATE  
OF-THE-ART  
TECH**

**SAVE  
\$400**

With a high capacity for manual or mechanised cutting, NEOCUTs are the ideal solution in industrial environments. Its 100% duty cycle up to 125 A enables it to **cut parts up to 57 mm thick**. Equipped with automatic air pressure management, they offer optimal cutting quality throughout the life of the consumables.

**AUTOMATIC AIR PRESSURE.**

**100% DUTY CYCLE.**

**HIGH PERFORMANCE TORCH.**

**EFFECTIVE IN EVERY WORKPLACE.**

**IP 23, DESIGNED TO LAST.**

Automatic management of pressure and air flow according to the set current.

Six working modes: cutting, trigger-lock cutting, gouging, trigger lock gouging, cutting of perforated sheets and marking.

Marking mode, ideal for tracing and identifying parts.

No HF arc ignition to avoid electromagnetic interference.

Pre-wired for use on automatic cutting table (optional analogue/ digital CNC kit).

Monitored wear and tear of consumables (nozzle and electrode).

Easy software updates via USB cable with no tools or disassembly required.

OLED display and multilingual interface: easy to use, with all settings at the touch of a button.

## NEOCUT 125 & WONDERCUT CNC CUTTING SYSTEM PACKAGE

The Wondercut - strong mechanical Steel structure to ensure cutting speed and cutting precision. With a dual drive motor and automatic torch height controller, CNC has never been so functional. A professional controller for plasma and oxy-fuel cutting. All in one console - controller and electric cabinet, the angle of the control display has been ergonomically designed with a slim body to save space.

# NEED A HAND MAKING SENSE OF THE NEW RULES?

GET IN TOUCH WITH DUROWELD TODAY

**Changes are coming to how Kiwi businesses manage welding fumes and air quality**

If you're unsure what these new Worksafe guidelines mean for your site, gear, or responsibilities, our team is here to help. We'll walk you through what's changing, what your obligations are, and what practical solutions are available.

➔ Call the Duroweld team on **0800 000 144**

## LOOKING FOR GEAR **START AT** DUROWELD.CO.NZ

Our full extensive Duroweld range is online — ready when you are. Whether you're after specs, pricing, or product info + view your special pricing, past orders, invoices and track orders.

Ordering is simple: if you're set up in our system, you can order online and we'll invoice you, or checkout with credit/debit card for easy on the spot payment.

**Are you part of our Loyalty Programme?**  
The more you buy the bigger rewards.

# DIAL IN YOUR MIG GAME

## WIRE SIZE MATTERS

0.8mm wire is a solid all-rounder, but consider 1.0mm for thicker material or higher amps. Finer wire = more control, heavier wire = deeper penetration.

## KEEP YOUR STICKOUT SWEET

Aim for 10–15mm stickout from the contact tip — too long and you'll lose stability, too short and you'll crowd the pool.

## PUSH OR PULL?

Push technique gives a flatter, cleaner bead with better gas coverage — ideal for most MIG jobs. Pulling can give deeper penetration but more spatter.

## GAS GAME

For clean, spatter-free welds on mild steel, 91/9 Argon-CO2 mix is the go-to. Straight CO2 is cheaper, but you'll sacrifice bead quality.

## CHECK YOUR CONTACT TIP

If you're getting erratic arc starts or bird-nesting, it could be time to swap your contact tip. A worn one kills consistency.

## KEEP IT CLEAN

Paint, rust, or oil on your workpiece will mess with arc stability. A quick wire brush can save a lot of rework.

## NVPM 200 Pulse Mig

WM-NVPM200LCD

### MIG/PULSE MIG + MMA /LIFT TIG

#### FEATURES AND ADVANTAGES

- ▶ Portable IGBT digital inverter multi-process welders.
- ▶ Comes with MIG/PULSE MIG/ MMA /LIFT TIG, 4 in 1 machine.
- ▶ An all-new interface called HDVision is applied with new welding experience.
- ▶ Come with complete protection function including power indicator, thermal protection to protect the machine.
- ▶ Synergic control, automatically matching optimal welding parameters including materials, cables, gases, etc.
- ▶ Flexible remote control is optional.
- ▶ Available for 1kg/5kgs spool, optimized welding performance for carbon steel, stainless, Cusi, Aluminum etc.
- ▶ Double pulse and single pulse MIG for good aluminum welding and low spatter steel welding performance.
- ▶ With hundreds of welding program suitable for different types of wires, gas combination and material.
- ▶ The machine is equipped with full welding functions, such as Pulse MMA, Fast Pulse MIG, Twin pulse, Fast Twin, Fast Up, Pulse TIG, Fast Root, Fast MIG, Fast Cold and so on.
- ▶ The machine is able to weld cellulosic electrodes under MMA mode.

## Cariarc 200B

WM-CA200B

#### DUAL POWER SUPPLY MODE

- ▶ Operates seamlessly with either battery power or direct connection to a standard power source.

#### HIGH-PERFORMANCE BATTERY

- ▶ Equipped with a robust 700Wh ternary lithium battery, providing continuous welding for up to 14 electrodes (2.5mm) or 12 electrodes (3.2mm). Exceptional performance even in lower-temperature environments. Includes a built-in rapid-charging feature, achieving a full charge in under 2 hours.

#### PFC TECHNOLOGY

- ▶ Automatically accepts input voltages ranging from 95-275V.
- ▶ Optimizes energy efficiency by achieving a high power factor of 0.93-0.99.

#### AUTOMATIC IDLE FUNCTION

- ▶ Machine automatically switches to Idle mode after 5 minutes of inactivity, significantly reducing power consumption.

#### ROBUST INDUSTRIAL DESIGN

- ▶ Engineered with durability in mind, each unit undergoes rigorous testing, including Low Voltage Directive (LVD), Electromagnetic Compatibility (EMC), vibration resistance, ingress protection (IP rating), and drop testing, ensuring reliability in challenging environments.

## MTA 201 AC/DC

### MIG TIG ARC

The MTA 201 AC/DC is a portable IGBT digital inverter multi-process welder 4 in 1 machine. Digital waveform technology allows multiple welding processes with optimized performance.

Utilizing a 32-bit Cortex M4 chip that can perform 500,000 operations per second for precise welding control. Low splash function, precise heat input and weld formation.

Expert mode: Deep parameter settings with 99 welding process channels.

Full function TIG welding, including pulse setting, gas pre-flow, post flow, slope up, slow-down, 2T/4T etc. AC ARCARE technology suitable for thin metal welding and spot welding.

Optimized welding performance for carbon steel, stainless, Cusi, Aluminum.

#### Key Features

- ▶ IGBT Digital Inverter
- ▶ 4 in 1 Machine
- ▶ AC TIG/DC TIG/MIG/MMA
- ▶ PFC Technology
- ▶ Synergic Mig Welding
- ▶ 7 inch LCD screen
- ▶ Arc force, hot start, anti-sticking function
- ▶ Full Tig function welding 2T/4T

# MES-200 ON-GUN EXTRACTION UNIT

WM-VACMES200 & M-MB244HUFUME

WELDING FUMES  
CAPTURED – RIGHT  
WHERE THEY FORM

## Optimum Protection from Welding Fumes

The portable, compact and powerful, high-vacuum extraction units MES-200 W3 capture in combination with fume extraction torches welding fumes directly and effectively at the source, protecting both the welder and the environment from harmful particles.

The MES-200 units come standard with an auto start-stop function and operate only when the operator is actively welding. This makes the MES-200 quiet, reduces energy consumption, and increases the service life of the motor by up to 5 times compared to similar systems.

## MES-200 W3 Product Features:

- Solid compact construction and light weight is easily portable and durable in the shop environment
- Automatic start-stop – minimizes noise, reduces energy consumption, and increases the service life of the motor by up to 5 times
- Efficient integrated manual cleaning increases filter service life
- Fully equipped with suction hose and adapter – just connect the torch and go!
- Compatible with any Euro Connect Mig Welder
- Quiet
- Lightweight and portable
- Easy to use
- 2 year warranty

## SUMIG VACUUM XM PACKAGE

WM-VACXM

RRP \$7000.00

CLEARANCE

PACKAGE PRICE  
**\$4450.00** (GST Excl.)

SAVE  
**\$2550**

The XM Torch 2M industrial vacuum cleaner is the ideal solution for extracting fumes directly from the welding torch.

This vacuum cleaner is equipped with one / two powerful By-Pass motors that guarantee up to 190 m3 / h of airflow each.

The industrial vacuum is controlled directly by the welding machine. A sophisticated sensor positioned on the vacuum allows detecting when there is a flow of current in the ground cable located in the special clip.

The XM Torch 2M industrial vacuum cleaner is equipped with a cellulose filter that allows you to filter welding fumes in total safety.

### PACKAGE INCLUDES:

- ▶ SUMIG Vacuum XM
- ▶ SUMIG535 TITAN-S 400 Gasless Gun
- ▶ 400amp 15ft Liner

## Hyundai Supercored 71LHM FCW 1.2mm (15kg)

MSW-SC71LHM1215

AWS A5.20 E71T-1M/9M

Hyundai SC-71LHM Cored is a titania type flux cored wire for all position welding of building, shipbuilding, bridge construction, machinery, and vehicles. It has extra low hydrogen level(H5) and provides an exceptionally smooth and stable arc with a fast freezing slag system. Provides excellent weld-ability with minimal clean up.

Use with Argon/  
CO2 Mixed Gas.
