KEEP THE SPARKS FLYING THIS WINTER

**PROGYS
250 TRI**

WM-083561

**NEW
PRODUCT
JUST LANDED**

**250
AMP**

**THREE
PHASE**

**ONLY
15KG**

With inverter technology, the PROGYS 250 TRI is a 3-phase MMA (SMAW) / TIG (GTAW) portable power source with exceptional welding performance. Featuring advanced electronics, this product guarantees maximum productivity, even in harsh environments. Its switchable Voltage Reduction Device (VRD) protects the welder in hazardous areas (mines, chemical and petrochemical installations, shipyards, etc.).

GYS Multiweld 400TG Package

WM-MW400TG10

PACKAGE INCLUDES:

- ▶ Multiweld 400T G
- ▶ Wire feeder
- ▶ 10M Welding Cable
- ▶ ABICOR Binzel 4m Torch
- ▶ 4m Earth Cable
- ▶ 4m Gas Hose

The MULTIWELD 400T G is a three-phase welding power source with separate multiprocess wire feeder (MIG/MAG, flux-cored wire, MMA and TIG Lift). It features an intuitive user interface with two digital displays for precise, easy-to-use parameter adjustment.

Fitted with the WF 20 wire feeder option, it allows precise control of welding parameters to deliver outstanding weld quality, even on aluminium.

MULTIPROCESS

- ▶ MIG/MAG
- ▶ MMA
- ▶ TIG DC Lift

OPTIMISED MIG/ MAG SETTINGS

- ▶ Choice of trigger behaviour: 2T or 4T.
- ▶ Welding aid: chart on the front panel to help the user set the filler wire voltage and wire diameter, to suit the thickness of the workpiece to be welded.
- ▶ Easy-to-read display, even in bright light.
- ▶ Dual interface for convenient adjustment when the wire feeder is slung or inaccessible.
- ▶ Simple interface with buttons and knobs, designed for easy adjustment by gloved hands.

GREAT VALUE

\$6,950.00 (GST Excl.)

PRICE AVAILABLE UNTIL 30 SEPT 2026

TITANIUM 321 AC/DC TRI

WM-069879

The TITANIUM 321 AC/DC is a high-performance TIG AC/DC power source that offers a wide choice of welding processes (TIG AC, DC, MMA). It can be used to weld various materials, including mild steel, stainless steel, aluminium, copper and titanium. Also ideal for welding thin material, the Pulse mode reduces deformation and delivers better arc control. Intuitive and extremely practical, the XXL digital interface offers straightforward control of the welding parameters.

6 TIG WELDING MODES

DC Standard: smooth current welding on most ferrous materials. DC Pulse: for welding workpieces together while limiting the heat input (pulses up to 20 kHz). FastPulse: up to 20 kHz pulse for specialist steels.

AC Standard: for welding aluminium alloys (Al, AlSi, AlMg, AlMn, etc.). AC Pulse: precise control of penetration by setting the AC frequency (frequency up to 2.5 kHz). AC Mix: alternating AC and DC currents to increase welding speed.

TIG WIZARD SOLUTION

Patented synergic mode for maximum productivity when tacking and welding aluminium, steel, stainless steel and copper parts, with or without filler metal.

GREAT VALUE

\$9,250.00 (GST Excl.)

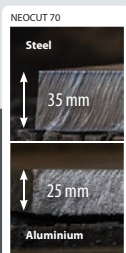

PRICE AVAILABLE UNTIL 30 SEPT 2026

GYS NEOCUT

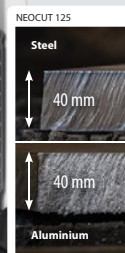

INVEST IN THE FUTURE

NEOCUT 70 T400 PLASMA CUTTER THREE PHASE

WM-083448

NEOCUT 125 T400 PLASMA CUTTER

WM-083462

NEOCUT professional-grade plasma cutters are characterised by a cutting capacity of up to 57 mm thick. Standard CNC connections enable mechanised operation. The colour interface, unique in the plasma cutter market, makes it easy to use and adjust, offering an unrivalled user experience.

- ▶ Automatic management of pressure and air flow based on the set current.
- ▶ **5 operating modes:** Cutting solid sheets, Cutting perforated sheets with continuous arc maintenance, Marking, Gouging and Spot (drilling points).
- ▶ **Marking mode**, ideal for tracing and identifying parts.
- ▶ **Arc ignition** without HF to avoid electromagnetic interference.
- ▶ **Pre-installed CNC connectors** (analogue and digital). Ready for automation, NEOCUT machines connect natively to cutting tables via their two standard connectors.
- ▶ **Integrated counter** to monitor wear on consumables (nozzle and electrode).
- ▶ The **USB connector** on the front panel allows you to easily update the machine and install new cutting programmes and synergies via the GYS website.
- ▶ **Multilingual digital interface:** easy to use, with all settings accessible from a single button.

GYS Stud Arcpull 350 Industry

WM-082946

- ▶ Single-phase inverter stud welder for welding studs, pull rings, insulation pins, rivets, and threaded inserts.
- ▶ Suitable for steel and aluminium applications with Synergic and Manual operating modes.
- ▶ Advanced pull-arc technology delivers strong, high-quality welds with minimal distortion.
- ▶ Programmable memory stores and recalls welding parameters for repeatable results.
- ▶ Ideal for automotive repair, panel fabrication, insulation fixing, and industrial manufacturing.

GREAT VALUE
\$5,400.00 (GST Excl.)

PRICE AVAILABLE UNTIL 30 SEPT 2026

GYS Stud Arcpull 700 Industry

WM-062207

- ▶ Heavy-duty three-phase inverter stud welder for welding studs, threaded inserts, pull rings, insulation pins, and rivet extraction rods.
- ▶ Designed for steel and aluminium applications with Synergic and Manual operating modes.
- ▶ Advanced pull-arc technology delivers fast, high-strength welds with consistent quality.
- ▶ Programmable memory and PLC connectivity for seamless integration into automated production environments.
- ▶ Ideal for high-volume manufacturing, automotive, fabrication, and industrial applications.

Heating Torch Outfit (Hose and Flint Lighter)

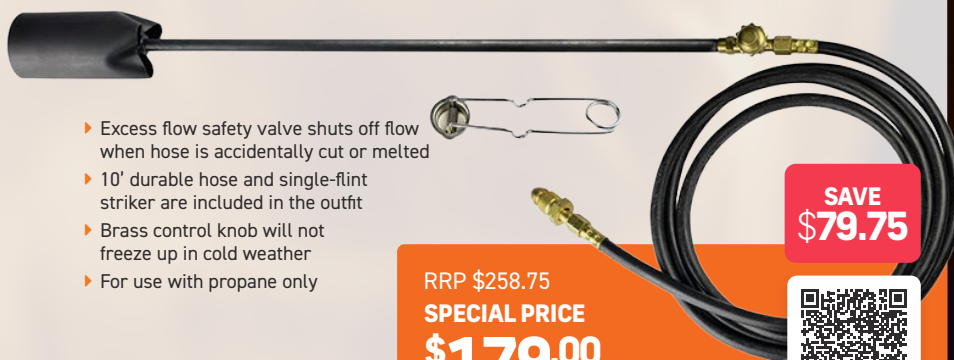

HT-508

Capacity: Cutting up to 6" (150mm),
Welding up to 3/8" (9mm)

FEATURES:

- ▶ Design for heavy-duty outdoor applications
- ▶ Large volume of heat (up to 5000,000 BTUs) for weed burning, ice melting, asphalt removal and any other applications
- ▶ For use with standard 201Bar barbeque liquid propane tanks
- ▶ All steel torch handle and torch head

- ▶ Excess flow safety valve shuts off flow when hose is accidentally cut or melted
- ▶ 10' durable hose and single-flint striker are included in the outfit
- ▶ Brass control knob will not freeze up in cold weather
- ▶ For use with propane only

PACKAGE

Generator 320G + GYS Voltage Sensing Wire Feeder Package

GEN-EN320G PACKAGE DEAL

- Complete portable welding package for on-site MIG, MMA, and gouging applications.
- 300A brushless DC welder generator with Constant Current (CC) and Constant Voltage (CV) output.
- Includes GYS voltage sensing wire feeder for reliable field MIG welding.
- 3kVA AC power to run grinders and other portable site tools.
- Electric start with Auto Idle for reduced fuel consumption and noise.
- Compact, rugged design ideal for utes, trailers, and remote job sites.
