

FROM FLAMES TO FUMES - YOUR REGULAR WELDING SUPPLIES NEWS AND DEALS

GETTING AHEAD OF EXTRACTION

Air Fed Helmet GYSMATIC 5/13 XXL True Color

WA-047846

Suited for difficult working conditions, with concentrated fumes and gas emissions the optoelectronic hood protects the welders face and eyes from UV, infrared and splashes.

Fully automatic, the mask switches from clear to tinted state in a fraction of a second.

This product features

- XXL screen (100 x 83 mm) for optimal visibility
- Touch sensitive button (sensitivity/delay/shade/saved settings).
- Save up to 3 settings.
- 4 sensors for improved performance.
- TIG welding > 2 A.
- 7 different shades (5>13) for all welding and cutting operations.
- TRUE COLOR technology

Supplied with

- Headband
- GYSMATIC 5.13 XXL + welding hood
- The respiratory protection system (motor + filter + waist belt)
- Lithium-ion battery + charger
- shoulder harness / air flowmeter / carrying bag

TOP-ENTRY AIRFLOW (170-230 L/min) floods the visor from above, sweeping away moisture to keep your view clear and condensation-free.

MES-200 On-Gun Extraction Unit

WM-VACMES200 & M-MB244HUFUME

Designed for efficient welding fume extraction the Flame Fume Extraction Unit MES-200 ensures the health of all workers.

MES-200 improves the welding environment by absorbing welding smoke and dust. Weighing approximately 29.3kg, this unit includes an automatic start/stop function, manual clean option and dust collection drawer.

FEATURES

- Compatible with any Euro Connect Mig Welder
- Quiet
- Lightweight and portable
- Easy to use

HUGONG

Cariarc 200B

WM-CA200B

DUAL POWER SUPPLY MODE

- Operates seamlessly with either battery power or direct connection to a standard power source.

AUTOMATIC IDLE FUNCTION

- Machine automatically switches to Idle mode after 5 minutes of inactivity, significantly reducing power consumption.

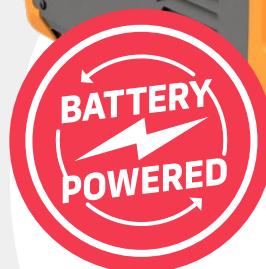

HIGH-PERFORMANCE BATTERY

- Equipped with a robust 700Wh ternary lithium battery, providing continuous welding for up to 14 electrodes (2.5mm) or 12 electrodes (3.2mm). Exceptional performance even in lower-temperature environments. Includes a built-in rapid-charging feature, achieving a full charge in under 2 hours.

ROBUST INDUSTRIAL DESIGN

- Engineered with durability in mind, each unit undergoes rigorous testing, including Low Voltage Directive (LVD), Electromagnetic Compatibility (EMC), vibration resistance, ingress protection (IP rating), and drop testing, ensuring reliability in challenging environments.

PFC TECHNOLOGY

- Automatically accepts input voltages ranging from 95-275V.
- Optimizes energy efficiency by achieving a high power factor of 0.93-0.99.

MTA 201 AC/DC

WM-TIT400ACDCP

MIG TIG ARC

The MTA 201 AC/DC is a portable IGBT digital inverter multi-process welder 4 in 1 machine. Digital waveform technology allows multiple welding processes with optimized performance.

Utilizing a 32-bit Cortex M4 chip that can perform 500,000 operations per second for precise welding control. Low splash function, precise heat input and weld formation.

Expert mode: Deep parameter settings with 99 welding process channels.

Full function TIG welding, including pulse setting, gas pre-flow, post flow, slope up, slow-down, 2T/4T etc. AC ARCARE technology suitable for thin metal welding and spot welding.

Optimized welding performance for carbon steel, stainless, Cusi, Aluminum.

Key Features

- IGBT Digital Inverter
- 4 in 1 Machine
- AC TIG/DC TIG/MIG/MMA
- PFC Technology
- Synergic Mig Welding
- 7 inch LCD screen
- Arc force, hot start, anti-sticking function
- Full Tig function welding 2T/4T

\$2790.00

PRICE AVAILABLE UNTIL 31 AUGUST 2025

NEW PRODUCT

DIAL IN YOUR MIG GAME

WIRE SIZE MATTERS

0.8mm wire is a solid all-rounder, but consider 1.0mm for thicker material or higher amps. Finer wire = more control, heavier wire = deeper penetration.

KEEP YOUR STICKOUT SWEET

Aim for 10–15mm stickout from the contact tip — too long and you'll lose stability, too short and you'll crowd the pool.

PUSH OR PULL?

Push technique gives a flatter, cleaner bead with better gas coverage — ideal for most MIG jobs. Pulling can give deeper penetration but more spatter.

GAS GAME

For clean, spatter-free welds on mild steel, 91/9 Argon-CO2 mix is the go-to. Straight CO2 is cheaper, but you'll sacrifice bead quality.

CHECK YOUR CONTACT TIP

If you're getting erratic arc starts or bird-nesting, it could be time to swap your contact tip. A worn one kills consistency.

KEEP IT CLEAN

Paint, rust, or oil on your workpiece will mess with arc stability. A quick wire brush can save a lot of rework.

TITANIUM

Precision and Power, Perfectly Controlled

Engineered for professional TIG and MMA welding, the TITANIUM range delivers industrial-grade performance with digital precision.

These high-duty AC/DC power sources offer unmatched arc control, multiple waveform configurations, and seamless energy regulation through E-TIG technology. Whether you're welding steel, aluminium, or exotic alloys, TITANIUM ensures deeper penetration, reduced distortion, and flawless consistency—even in demanding environments. Built for productivity, these machines feature free firmware updates, full traceability, and intuitive, customizable interfaces that evolve with your workflow.

WIZARD Modes

Expert Results Made Effortless

- Ultra-fast, precise tacking in under a second—usable with or without filler metal
- Fully synergic settings simplify setup based on material and joint type
- Optimised arc behaviour produces clean, consistent welds with minimal oxidation or distortion
- Accessible to beginners, yet compatible with automated production environments
- WIZARD LAB mode allows experienced users to customise and develop their own weld cycles and waveforms

Dedicated modes for different materials:

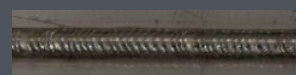

WIZARD Alu Aéro

Ultra-quiet, precision aluminium TIG welding

WIZARD Steel

Strong, low-defect welds in all positions

WIZARD Stainless Steel

High-purity stainless welds with no need for passivation

The XM Torch 2M industrial vacuum cleaner is the ideal solution for extracting fumes directly from the welding torch.

This vacuum cleaner is equipped with one / two powerful By-Pass motors that guarantee up to 190 m³ / h of airflow each.

The industrial vacuum is controlled directly by the welding machine. A sophisticated sensor positioned on the vacuum allows detecting when there is a flow of current in the ground cable located in the special clip.

The XM Torch 2M industrial vacuum cleaner is equipped with a cellulose filter that allows you to filter welding fumes in total safety.

PACKAGE INCLUDES:

- ▶ SUMIG Vacuum XM
- ▶ SUMIG535 TITAN-S 400 Gasless Gun
- ▶ 400amp 15ft Liner
- ▶ Contact Tip
